

C-11 Premium Satin Art Gicleé Canvas

C-11 is a wonderful 19 mil polyblend canvas perfectly suited to demanding fine art applications where the texture and the feel of traditional canvas is balanced with the properties of a synthetic yarn additive. This facilitates a more pliable, uniform construction and retains much of the warmth of cotton, yet will not yellow, crack or curl. The premium coating on a nicely textured gesso surface is finished in a mild satin, making C11 a wonderful choice for fine art applications and art reproduction. The color gamut of this canvas is exceptionally vivid and very striking when used with dye based inks.
