

PC-17 Premium Grand Photographer Series Canvas

PC-17 is a premium grand photographer series canvas bright white polyblend canvas. It is a 19 mil canvas that offers a unique supple feel, for easy stretching and less tension for mounting and framing. The smooth, proprietary print surface is not found in other matte canvas product. Standard benefits found in PC-17 canvas are extended resolution, fine detail, and color gamut, vivid colors, exceptional D-max, fast dry times, and ease of handling while maintaining the luxurious appearance and touch of canvas. It is perfect for dimple-free Photographic, Portrait and Fine Art applications. It also works well with waterborne and dry mount film laminates.

Product Categories

Aqueous Media

Available Sizes

17" X 40'; 24" X 40'; 36" X 40'; 42" X 40'; 44" X 40';
50" X 40'; 54" X 40'; and 60" X 40' available on a 2" interior diameter (ID) core.

Properties

Coating: Polymeric Non-toxic
Surface: White - Matte, Water resistant
Caliper: 19 mil
Whiteness (CIE Ganz 82): 112
Brightness(TAPPI T452): 99
Gloss(60°): 2.4

Ratings

Health: - 0
Reactivity - 0
Flammability - NFPA 1 not spontaneously combustible

Environment

Functional temperature range - 50° to 85° Fahrenheit
Functional relative humidity range - 30% to 65%
Ink dry time - varies with type and amount of ink, relative humidity and temperature.

Inks

Combined with pigmented inks, the water resistant inkjet coating provides for excellent longevity of printed images, and maintains a high degree of ultraviolet resistance. Dye based inks, while maintaining excellent vibrancy, show a slightly lower ultraviolet resistance.

Applications

**Fine Art Murals Portrait Reproductions
Art Reproduction**

Handling & Storage

Store store standing on end in a cool, dry place around 70°F and 40-60% relative humidity. Always place in plastic sleeve and suspend in box with end caps when not in use.
